

Slim Press & Release Mount for Displays in Portrait Orientation

Item #LMVSP

The LMVSP Press & Release Slim Pop Out Mount is built especially for portrait digital signage applications. Being OSHPD certified and ADA compliant makes it a perfect choice for a variety of recessed wall or picture-framed digital signage applications.

What really makes the LMVSP unique though is access to the back of the display in under 5 seconds. Featuring a depression clasp that automatically latches closed and springs open with a gentle push on the bezel of the display, this makes servicing displays easier than ever.

Once pressed and opened, the LMVSP extends out and includes a service-position kickstand for 7° of clear access to the rear of the display. With an open design, it is easy to manipulate cables or media players without having to deal with the traditional string release designs. In addition, the LMVSP's scissor design adds additional stability upon mount extension.

Fine-tune adjustments are key to any digital signage installation, that's why we have included convenient X, Y and Z adjustments knobs.
